Skills Summary

I'm a senior Full Stack developer and a tech instructor with around 10 years of working experience. I enjoy development and have a sharp eye for designing beautifully tested code.

Education

Computer Science / 2007 - 2012

Bachelors degree in Computer Science at the [American University of Science and Technology](#)

Experience

DuCargo

Senior Full Stack Developer / July 2018 – December 2018 – Remote, Contract

DuCargo is a cloud platform for managing carrier rates and finding the right price for shipments around the globe.

My role was mainly focused on building and testing a Vue SPA.

Tech Used: PHP, VueJS, Redis, Mysql, Docker, PHPUnit, Mocha, TestCafe, Vue Testing Util, Tailwind and many more.

Smarty Systems

Team Lead & Senior PHP Developer / October 2015 – May 2016 – Beirut, Lebanon

Smarty Systems is a company owned by the Head of the Interpol Foundations (Elias Murr). We worked on building a NLP system that crawl the web and different social platforms and provide data with meaning to the end user.

I was the team lead, I managed two PHP developers, one in Lebanon and the other in Ukraine. Other than managing the teams and translating the business requirements to the dev teams, I spent a good amount of time writing code and testing features.

I build web crawlers, dashboard and admin sections.

Tech used: Laravel, Vue, Redis, Elasticsearch/Kibana/Logstash, Neo4j, NodeJs, MySQL, ChartJs, AlchemyJS, ThreeJS and many more.

Arabic E-Publishers

Team Lead & Senior PHP Developer / December 2014 – October 2015 – Beirut, Lebanon

Arabic E-Publishers is a leading Lebanese company that focuses on building products for Judges, lawyers and the government. They own <https://almustachar.com/> which is a legal management system that provide a software/database for all laws and legal newspapers.

I worked with them on building <https://office.legal> which is a rebuilt of their desktop software.

I was the lead developer and I had 3 other developers working with me on building the product. I focused mostly on the Backend/API and the infrastructure.

Tech used: Laravel, AngularJs, Redis, MySql, Digital Ocean, Laravel Forge.

Conveev

Senior PHP Developer / April 2014 – February 2015 – Remote

Conseev is a company that owns multiple products, they help other companies in the process of creating, launching, and operating SaaS or web-based service businesses.

My main focus while working with them was to maintain and add features on their hosting platform Cloak Hosting. I also worked on refactoring legacy Codeigniter code, built an internal system to manage content publishing and migrated an entire hosting platform from PHP5.2 to 5.4 and redeployed it to their own servers.

Tech used: PHP, Laravel, Codeigniter, MongoDB, WHMCS/CPANEL.

Vinelab

Senior PHP Developer / November 2013 – September 2014 – Beirut, Lebanon

Vinelab is a media technology company that develops innovative, effective and measurable solutions in the influence of third party voices.

I worked with them back when in its early stages along with its founding members.

My focus was to build the backend for their client facing platform.

During my time with them, we worked with some exciting technologies, and we built

<https://github.com/Vinelab/NeoEloquent> which is the only Laravel Neo4j OGM.

Tech used: PHP, Laravel, PhpUnit, PhpSpec, AngularJs, NodeJs, Redis, Neo4j, Docker, Multiple social platform APIs.

<https://vinelab.com/>

Bible Society Lebanon

E-Management Supervisor / July 2012 – August 2013 – Beirut, Lebanon

The Bible Society in Lebanon is the main distributor and printer of the Bible.

I worked on building their websites and managed the development for their mobile applications.

Tech used: PHP, Drupal 7, Java, Objective C

<https://www.biblesociety.org.lb>

Philka

IT Manager / April 2011 – February 2012 – Beirut, Lebanon

Philka is an authorized distributor of Ingersol Rand in Lebanon.

I worked as a network/server administrator. I also worked on implementing Maximizer CRM and configuring it.
